Performance Testing Report:

Performance testing is critical to ensure your solution is fast, scalable, and stable under specific workloads. Document your testing strategy, the tools utilized, and the specific metrics measured against your target thresholds.

Step 1: Test Scenarios & Tooling

S.No	Test Type	Scenario / API Endpoint Tested	Tool(s) Used
1	Load Testing	POST /api/campaigns/generate POST /api/sale -pitches/generate POST /api/leads/score	Apache JMeter / Locust
2	Stress Testing	GET /api/history POST /api/campaigns/generate POST /api/sales -pitches/generate POST /api/leads/score	
3	Spike Testing	POST /api/campaigns/generate POST /api/leads/score	
4	Endurance Testing	POST /api/campaigns/generate GET /api/history POST /api/leads/score	

Step 2: Key Performance Indicators (KPIs) & Results

S.No	Metric (KPI)	Target Threshold	Actual Result	Status
1	Average Response Time	2,450 ms		
2	Peak Response Time	2,210 ms		
3	Throughput (Requests/sec)	1,680 ms		
4	Error Rate	0%		
5	CPU/Memory Utilization	42%
