

Technology Stack

Date	14 August 2026
Team ID	XXXXXX
Project Name	XXXXXX
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML5, CSS3, JavaScript	Provides the structure for the MarketAI Suite dashboard, campaign forms, sales-pitch forms, lead-upload interface and history pages.

2	Backend / Server-Side	Python + Flask	<i>Flask is lightweight and flexible, making it suitable for developing the REST APIs required to connect the frontend, business logic, database and Groq AI service.</i>
3	Database / Data Storage	SQLite & Pandas	Used to read, validate and process uploaded CSV lead data efficiently before scoring and analysis.
4	Cloud / Hosting / Deployment	<i>AWS CLI</i>	Provides command-line access to AWS resources if the project is extended to cloud deployment or AWS Labs.
5	Version Control & CI/CD	<i>Git-Hub</i>	Provides source-code management , change tracking, backup and collaboration capabilities.

6	Third-Party APIs / Other Tools	<i>Groq API</i>	Provides high-performance access to the selected LLaMA model for generating marketing and sales intelligence.
